

St. Aubin's Action Group on RECLAMATION

1. First and foremost that land reclamation is withdrawn from the Island plan.
2. The group wishes to uphold the 100% workshop NO to land reclamation for the 10 year period concerned, and feels that this fact should be upheld and stated CLEARLY.
3. The group believes that it is important for the "**Ramsar**", "**Quality of the environment**" and the "**Reclamation**" groups to work closely together, in order to act as one body in determining their conservation objectives.
4. That the elected politicians of St Aubins should ensure that the priority of any funding is given to investigate and determine alternative parking and traffic solutions agreed at the forum, in which they participated.

CONCERNS OF THE GROUP

With reference to the Hopkins Report, and the proposed excavation and the subsequent disposal of waste material from the esplanade tunnel and car park, the Group is concerned that the waste products could be all too conveniently dumped in St Aubins. Also, there are obvious fears about the nature of any waste - which may be polluted/contaminated which would produce local environmental problems.
